

B-SAFE (Web security and personal data protection)

Project start date: 10-01-2018

Project deadline: 09-30-2020

B-SAFE project, which belongs to the Key Action 2 of the Erasmus + program (KA2 - Cooperation for Innovation and the Exchange of Good Practices), aims to improve the scope of individual action of young adults in their personal, work and life in other areas of life.

UDIMA participates in the project as a partner together with these entities:

- [Bit cz training, s.r.o. \(Coordinator, Czech Republic\)](#)

Partners:

- [EDIT VALUE \(Portugal\)](#)
- [Bit Schulungscener \(Austria\)](#)

Objectives

The main objectives of the project are:

- Use of the knowledge to expand access to basic and core knowledge.
- Understand by which national and European laws they are affected and which rights and duties they have.
- Autonomously read and understand basic legal texts (for example, contracts, constitutions, judgments and wills).
- Simultaneously, it will enhance training participants' chances of employment by championing not only professional skills but also legal know-how for law-sensitive issues (for example, data protection, writing contracts, INDUSTRY 4.0, among others).
- Greater work mobility on the European job market due to knowledge gain on online platform.

The target groups of B-SAFE are young adults, teachers, employers / employees and the general public.

Final Results

Some of the results to be developed are the following one's:

- A development of the knowledge base focused on the web security and personal data protection following the INDUSTRY 4.0.
- A useful and user-friendly platform where the knowledge base will be placed.
- Facilitating the linkage between adults, manufacturing companies, educational centres, VET, Universities and suppliers of innovative solutions.
- Finally, get a knowledge platform that is compatible with smartphones or tablets and easy to access.
